

## **Ansonia's Demographics**

### **Population**

In 2000, Ansonia's population of 18,554 comprised 5.2 percent of the NVC region. Ansonia's population, the seventh largest population in the NVC, grew by .82 percent from 1990 to 2000. The population in the NVC increased by 4.6 percent from 1990 to 2000. Connecticut's population grew by 3.6 percent during the 1990 to 2000 period.

### **Population by Age**

In 1990, adults from the ages of 25 to 44 made up one-third of the population in the NVC, the state, and Ansonia. In the same year, people under the age of 18 constituted 23 percent of the population in the NVC, the state, and Ansonia. Also in 1990, people from the ages of 45 to 64 constituted 18 percent of Ansonia's population, 19 percent of the NVC's population, and 20 percent of Connecticut's population. The population over 65 comprised 17 percent of Ansonia's population, 15 percent of the population in the NVC, and 14 percent of the state's population in 1990. The percentage of the population between 18 and 24 was 9 percent in Ansonia, 10 percent in the NVC, and 11 percent in Connecticut in 1990.

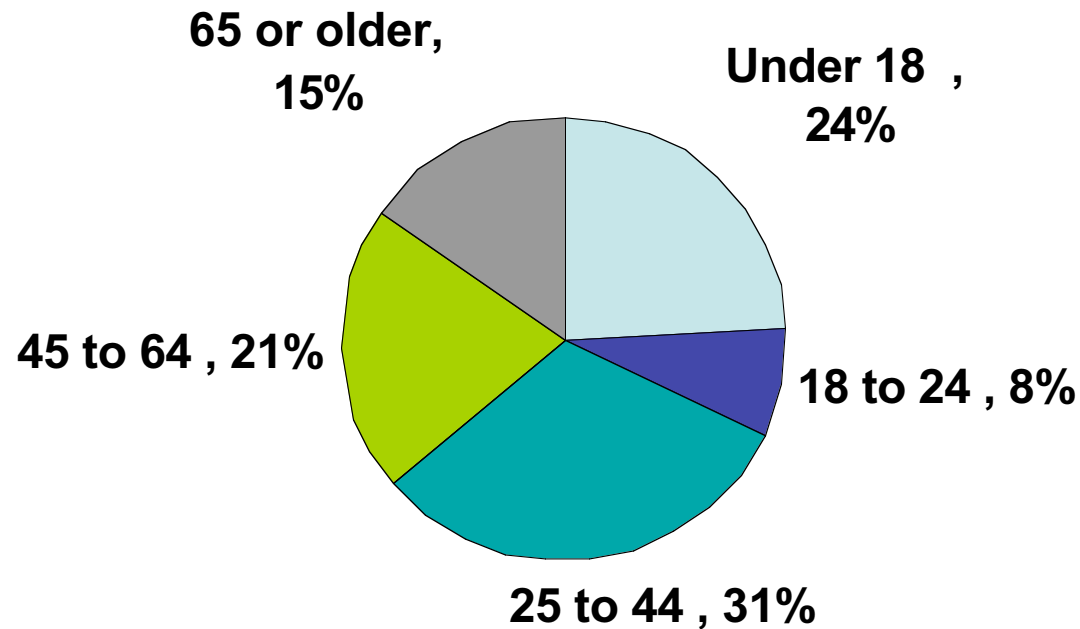

In 2000, adults from the ages of 25 to 44 made up 31 percent of the population in Ansonia and 30 percent of the population in the NVC and the state. In the same year, people under the age of 18 constituted 25 percent of the population in the NVC and the state and 24 percent of Ansonia's population. Also in 2000, people from the age of 45 to 64 made up 21 percent of Ansonia's population and 23 percent of the population in the NVC and Connecticut. The population over 65 comprised 15 percent of the population in Ansonia and the NVC and 14 percent of the state's population in 2000. The percentage of the population between 18 and 24 was 8 percent in Ansonia, 7 percent in the NVC, and 8 percent in Connecticut in 2000.

Ansonia had the second highest percentage of residents between the ages of 18 and 24 in the NVC in 2000. It also possessed the fourth highest percentage of residents over 65 in the NVC in 2000. It maintained the seventh largest percentage of residents between 25 and 44 in the NVC in 2000. By contrast, Ansonia ranked 16 out of 17 for residents between the age of 45 to 64 and it had the sixth smallest percentage of residents below 18 within the NVC in 2000.

### **Racial and Ethnic Populations**

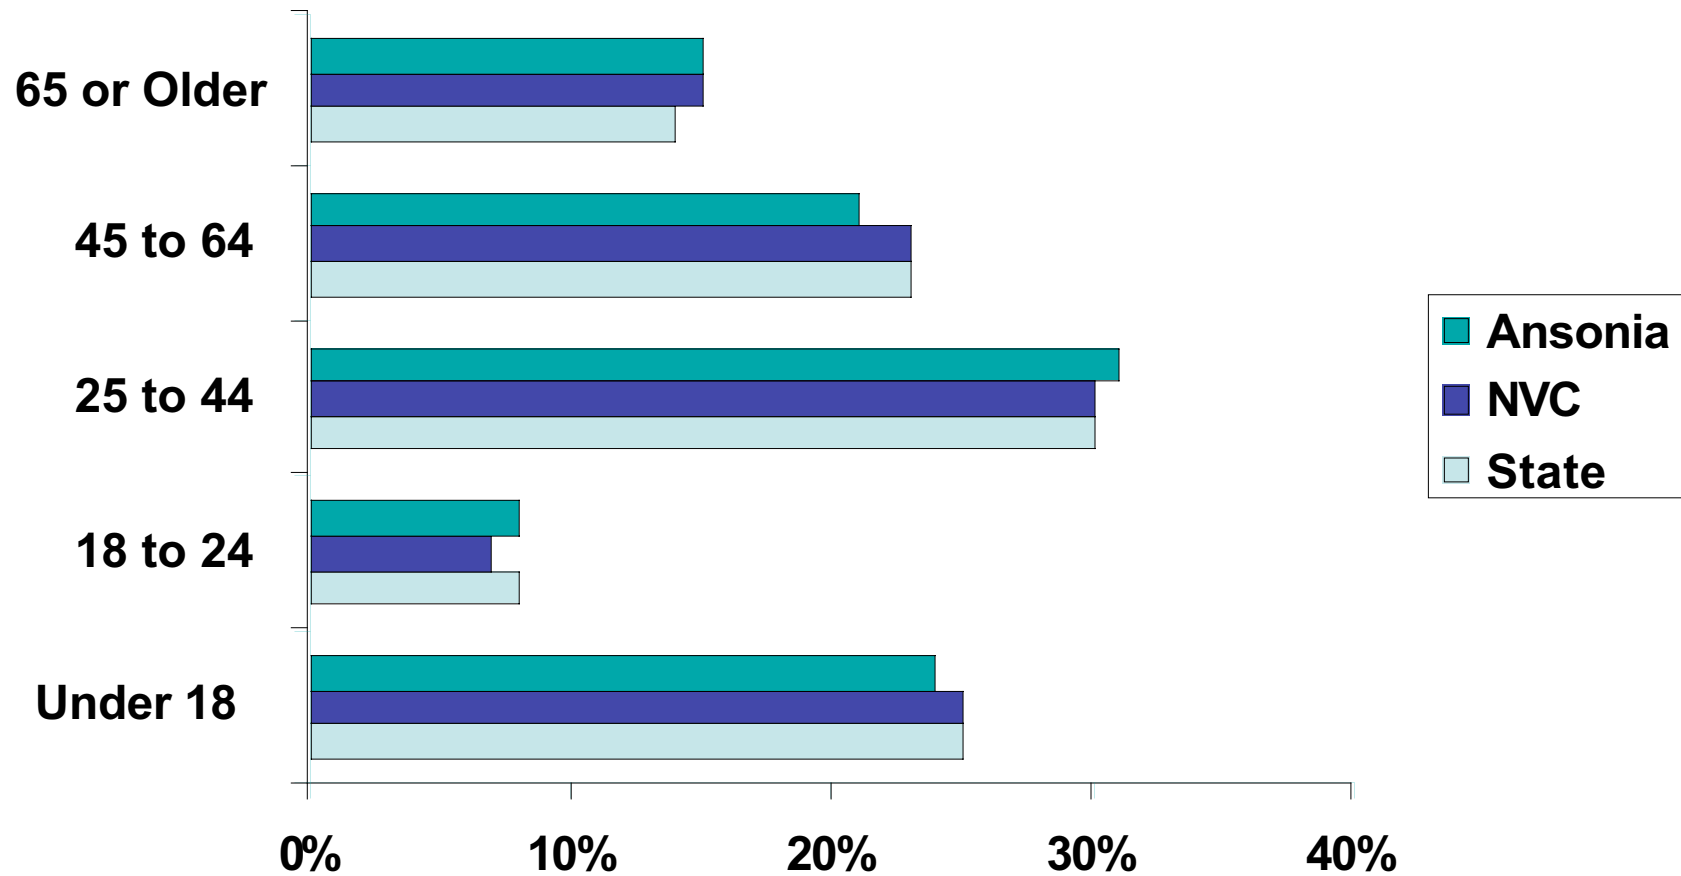

In 2000, African Americans constituted 8 percent of Ansonia's population whereas they comprise 6.5 percent of the NVC and 9.1 percent of the state's population. In 2000, Latinos made up 7 percent of Ansonia's population, 9 percent of the NVC's citizenry, and 9 percent of the population in the state. Non-white residents comprised 14.5 percent of Ansonia's population, 14 percent of the NVC's citizenry, and 18 percent of the population in Connecticut.

# Distribution of Age Cohorts for Ansonia, 2000

Source: 2000 Census

# Age Cohorts for Ansonia, 2000

Source: 2000 Census

Whites comprise 86 percent of the population in Ansonia and the NVC and 82 percent of the population in Connecticut.

Ansonia possessed the third highest percentage of Latino residents in the NVC in 2000. Waterbury and Derby had the highest percentages of Latinos within the NVC in 2000.

Ansonia also had the second highest percentage of non-white residents in the NVC in 2000. Waterbury possessed the highest percentage of non-white residents in the NVC.

### **Change in Racial and Ethnic Populations**

During the period from 1990 to 2000, the percentage of African Americans in the population increased by 2.5 percent in Ansonia (from 18,759 to 23,135) whereas it grew by 23.3 percent in the NVC and 13 percent in Connecticut.

The Latino population significantly increased in Ansonia, the NVC, and Connecticut in the last ten years. The Latino population expanded by 190.3 percent in Ansonia (from 474 to 1,376), 64 percent in the NVC, and 50 percent in Connecticut from 1990 to 2000. Ansonia experienced the largest percent growth in Latino population in the NVC during the last ten years.

### **Educational Attainment in Ansonia**

The following categories measure the highest degree achieved by a person. For example, the figure that 18 percent of the citizens in Connecticut graduated from college means that a bachelor's degree is the highest level of education attained by 18 percent of Connecticut residents.

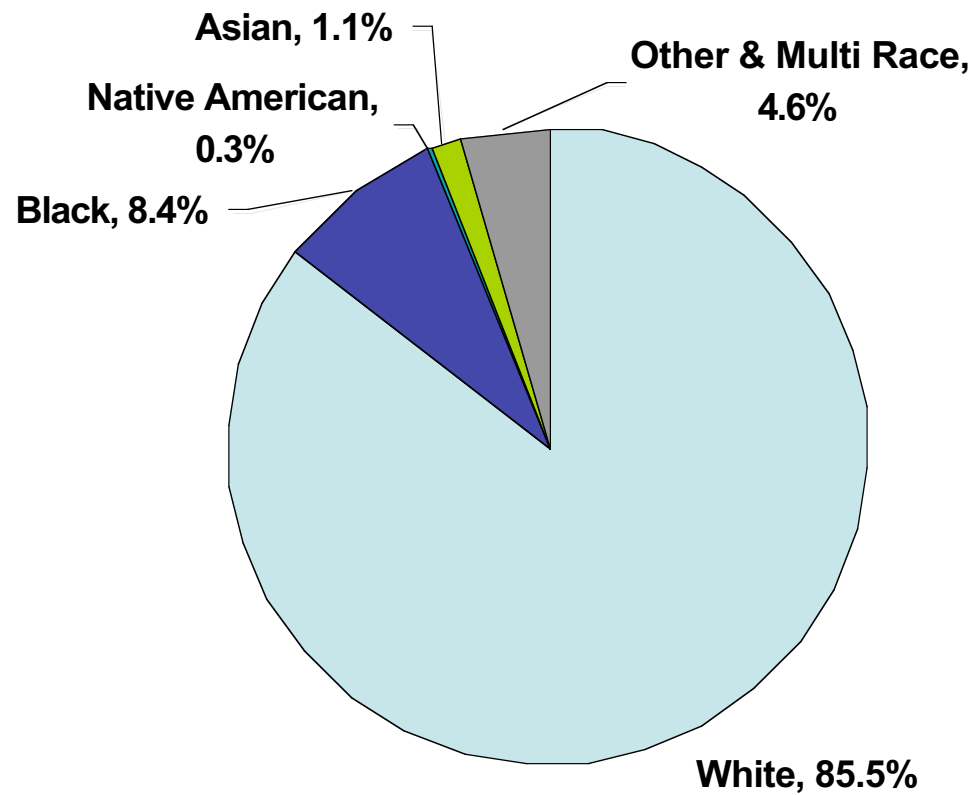

In 2000, 9 percent of people in Ansonia over the age of 25 earned a college degree as their highest form of education whereas 15 percent of the residents in the NVC and 18 percent of citizens in the state graduated from college and did not pursue their education beyond this level.

In the same year, one-quarter of Ansonia's population over the age of 25 attended college for a period of time without receiving a bachelor's degree and 26 percent of the citizens in the NVC and 24 percent of Connecticut residents went to college without obtaining a degree.

In 2000, 13 percent of residents in Connecticut held a professional degree, 10 percent of the NVC's citizens possessed a professional degree, and 6 percent of Ansonia's residents had a professional degree.

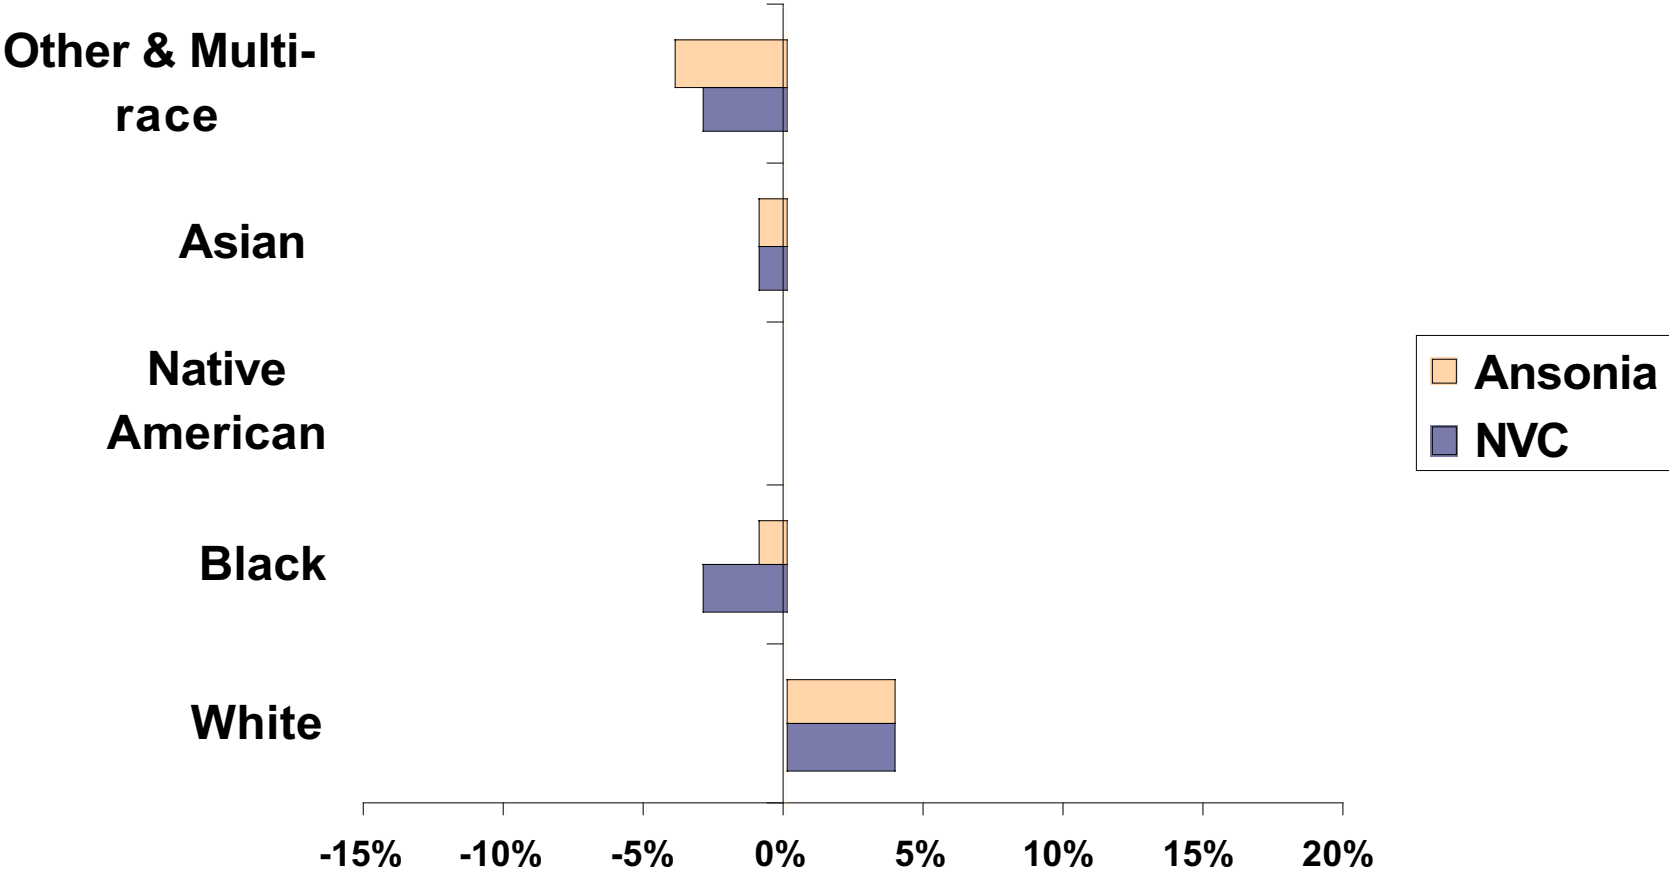

Slightly more than 40 percent of Ansonia's residents did not pursue any further education after receiving a high school diploma. By contrast, 31 percent of NVC residents and 29 percent of the citizens in Connecticut finished school after obtaining a high school diploma.

# Distribution of Race for Ansonia, 2000

Source: 2000 Census

# Percentage Point Difference in Race Cohorts from Connecticut for Ansonia, 2000

Source: 2000 Census

Slightly less than 20 percent of the residents in Ansonia and the NVC failed to receive a graduate equivalency diploma (GED) whereas 16 percent of Connecticut's citizens did not receive a GED as their highest degree of formal education.

*The following statistics examine the percentage of residents who graduated from college.*

Within the NVC, Ansonia has the second lowest percentage of residents over the age of 25 who received *at least* a college degree. It ranks below the NVC and the state for percentage of residents over 25 who received a college degree. Waterbury possesses the lowest percentage of citizens who *at least* received a college degree in the NVC. Cheshire has the highest percentage of college graduates among NVC towns.

The percentage of residents who possessed *at least* a college degree increased by more than 20 percent in Ansonia during the period from 1990 to 2000. Ansonia experienced the sixth lowest percent gain in college graduates among NVC towns during this period. Ansonia had a slightly lower percent increase in college-educated residents than the NVC during the decade of the 1990's. The percentage of college graduates decreased in Waterbury over the last ten years whereas the percentage of college graduates grew by nearly 70 percent in Bethlehem.

### **Poverty in Ansonia**

In 1999, 7.6 percent of Ansonia's population lived below the poverty line. In the same year, 7.9 percent of Connecticut's residents and 7.7 percent of the people within the NVC lived in poverty. Ansonia possessed the third highest percentage of people in poverty within the NVC in 1999. Waterbury and Derby had the highest percentage of residents living in poverty in the NVC in 1999. Prospect and Oxford had the smallest percentage of residents living in poverty in the NVC in 1999.

In total, 1,394 Ansonia's residents live in poverty. Ansonia had the third highest number of people living in poverty among NVC cities and towns in 1999. Waterbury and Naugatuck possessed the highest number of residents living in poverty within the NVC in 1999. Prospect and Bethlehem had the smallest number of residents living in poverty in the NVC in 1999.

### **Increases in Poverty in Ansonia, 1989-1999**

The population living in poverty in Ansonia failed to increase from 1989 to 1999. Over the same period, the poverty population increased by 30 percent in the NVC and 19 percent in the state. Ansonia ranked 12<sup>th</sup> out of the 17 NVC towns for percent change in people living in poverty from 1989 to 1999. During this ten-year period, five NVC towns (Bethlehem, Prospect, Watertown, Middlebury, Seymour) experienced a decrease in the number of residents living in poverty. Beacon Falls, Southbury, and Thomaston possessed the highest percent increases in poverty population in the NVC from 1989 to 1999.

## **Income in Ansonia**

### **Median Household Income**

People in Ansonia earn less than those in the state.<sup>1</sup> The median household in Ansonia in 1999 was \$43,026, which was less than the median household income in Connecticut (\$53,935). In 1999, Ansonia had the second lowest median household income in the NVC. Median family income was lowest in Waterbury (\$34,285) and highest in Cheshire (\$80,466) within the NVC in 1999.

Over time, the median income of households in Ansonia increased at a rate less than the increase in median household income in Connecticut. The median household income increased in Ansonia by 26 percent from 1989 to 1999 whereas it increased in Connecticut by 29 percent. Ansonia experienced the second lowest percent increase in median household income in the NVC from 1989 to 1999. Waterbury had the lowest percent increase in median household income (12%) and Bethlehem experienced the highest percent increase (43%).

The annual average increase in median household income grew at a slower pace in Ansonia than it did in Connecticut. The annual average growth rate in median household income was 2.33 percent in Ansonia and 2.60 percent in Connecticut. Ansonia had the second smallest annual average increase in median household income in the NVC from 1989 to 1999. Waterbury had the lowest average annual increase (1.17%) whereas Bethlehem experienced the highest average annual increase in median household income (3.63%).

The median household income in Ansonia increased by \$8,845 from 1989 to 1999 but it increased by \$12,214 in the state during this ten-year period. Ansonia had the second lowest increase in median household income in the NVC from 1989 to 1999. Waterbury's median household income increased by the fewest dollars (\$3,752) whereas Oxford experienced the largest absolute increase in median household income (\$22,678) among NVC towns from 1989 to 1999.

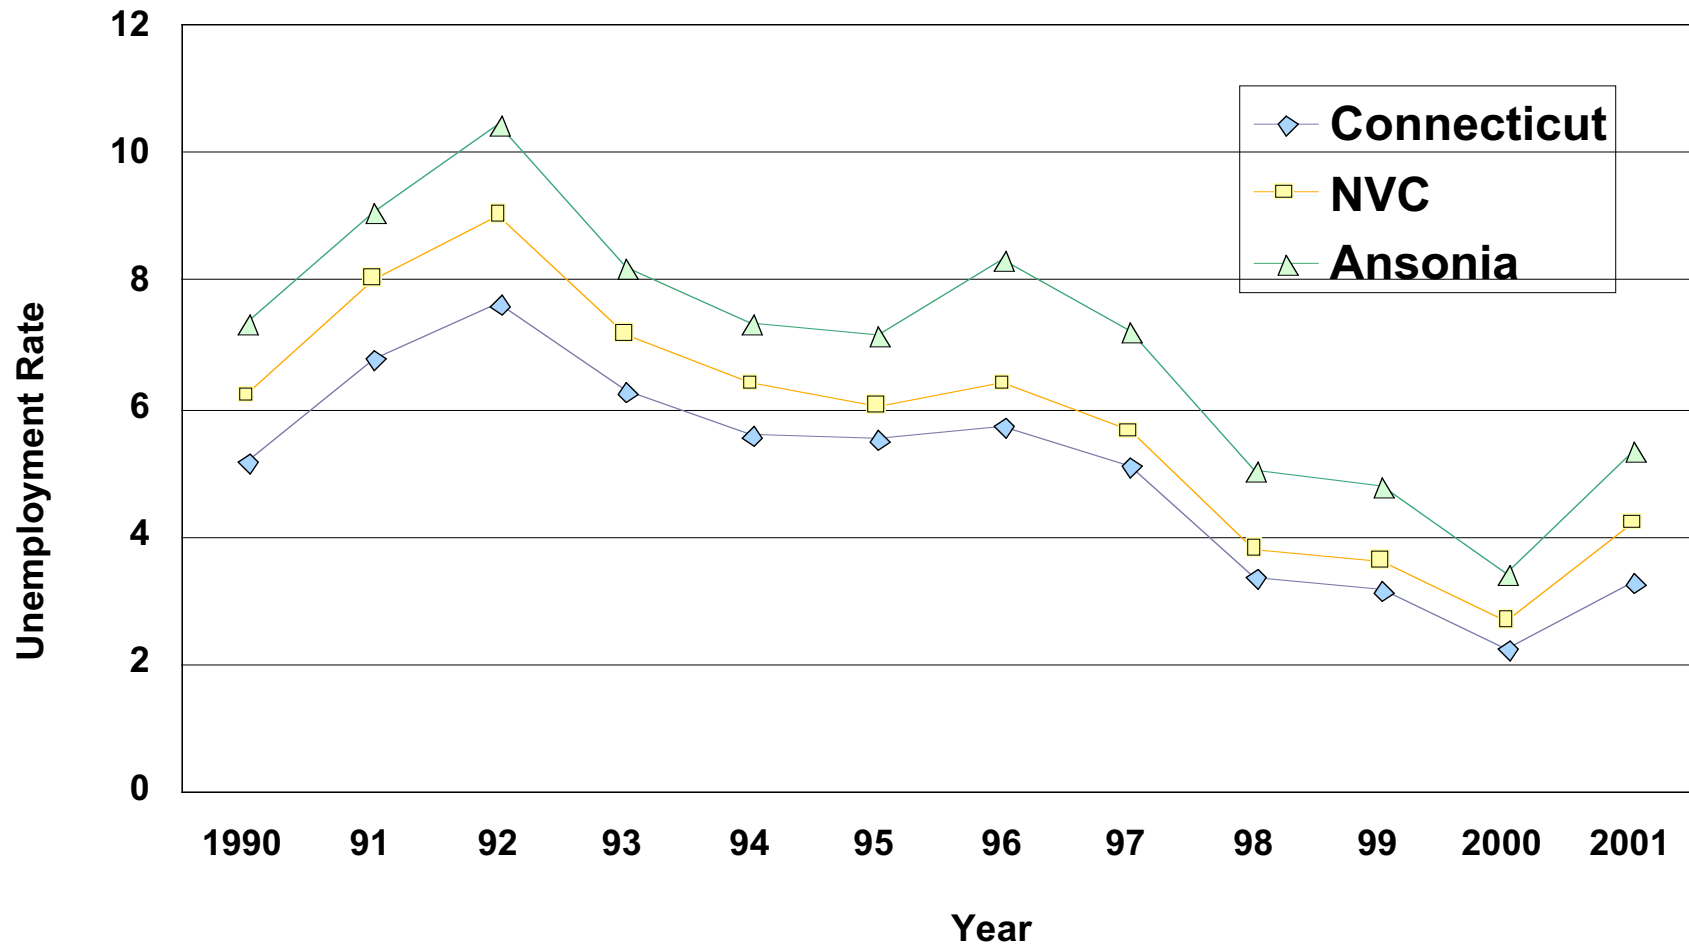

Ansonia's ranking for median household income among NVC towns did not change from 1989 to 1999. Ansonia ranked sixteenth out of the 17 NVC towns for median household income in 1989 and 1999.

---

<sup>1</sup> The median household income for the NVC is unavailable. "The median calculations for the NVC could only be calculated by the Census Bureau because the calculation would need every household's income in the NVC for this calculation." We decided against calculating the average incomes for the households in the NVC because these incomes would be badly skewed in some of the smaller towns.

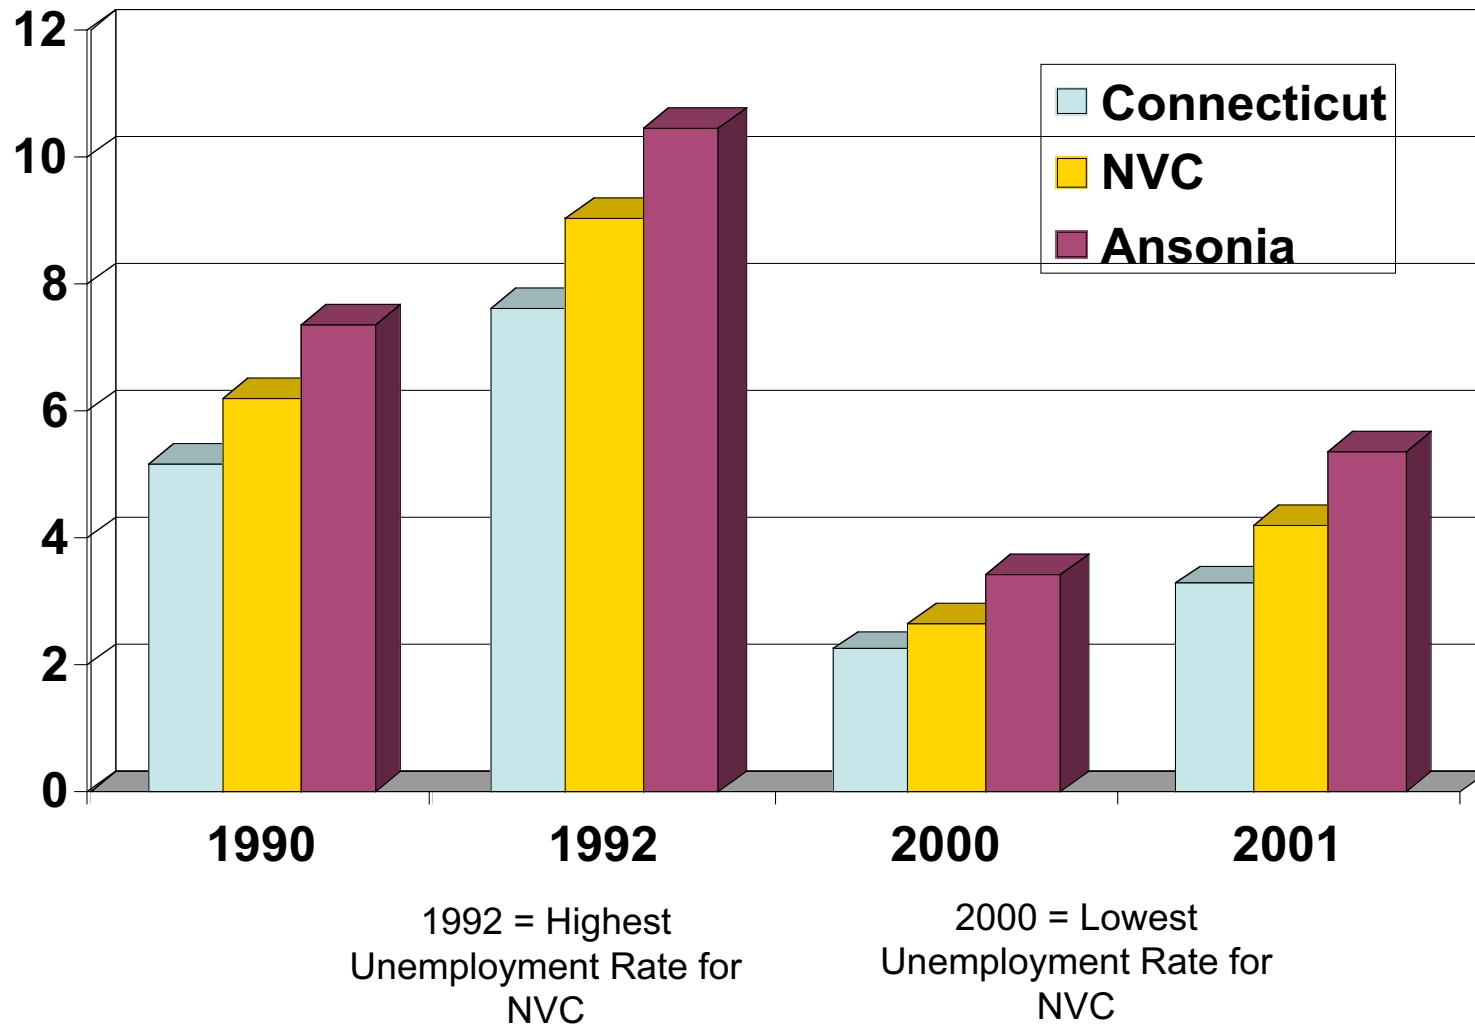

# Unemployment Rates for Connecticut, NVC, and Ansonia, 1990-2001

Source: Connecticut Department of Labor

# Unemployment Rates For Connecticut, NVC, and Ansonia, Selected Years

## **Unemployment and Labor Force Characteristics in Ansonia**

In 2001, the unemployment rate was 5.36 in Ansonia, 4.21 in the NVC, and 3.28 in Connecticut. In that year, Ansonia possessed the second highest unemployment rate among NVC towns. Waterbury had the highest unemployment rate (6.02) whereas Cheshire possessed the lowest unemployment rate (2.19).

In 2001, Ansonia possessed 4.8 percent of the labor force in the NVC. Its total labor force of 8,473 was the sixth largest in the NVC in 2001. Waterbury maintained the highest share of the NVC's labor force at 29 percent whereas Bethlehem only possessed slightly more than one percent of the NVC's labor force in 2001.

Despite its small labor force, Ansonia maintained slightly more than 6 percent of the unemployed labor force in the NVC in 2001. Ansonia maintained the fourth largest share of the NVC's total number of unemployed in 2001. Waterbury possessed the largest share of unemployed (41%) whereas Bethlehem possessed the smallest share (.64%) of the NVC's unemployed in 2001.

### **Changes in Labor Force and Unemployment Rate Over Time**

Ansonia's labor force declined by 14.6 percent from 1990 to 2001 whereas the labor force in the NVC and the state decreased by 6.7 percent and 6.3 percent, respectively. In 1990, Ansonia's labor force was 9,922 whereas it was 8,473 in 2001. In total, Ansonia lost 1,449 workers from 1990 to 2001.

From 1990 to 2001, Ansonia's unemployment rate was highest in 1992 when it reached 10.44. The highest unemployment rates for the NVC and the state over the last 11 years were 9.03 in the NVC and 7.63 for Connecticut. These high unemployment rates also occurred in 1992. Ansonia's low for unemployment rate was 3.43 in 2000. The lows for the NVC and the state were 2.68 and 2.25, respectively. These low unemployment rates also took place in 2000.

Ansonia's unemployment rate increased by 3.10 percentage points from 1990 to 1992. The unemployment rates grew by 2.82 percentage points in the NVC and 2.47 percentage points in the state from 1990 to 1992. Ansonia's unemployment rate decreased by 7.01 percentage points from 1992 to 2000. The unemployment rates decreased by 6.35 percentage points in the NVC and 5.37 percentage points in the state from 1992 to 2000. Ansonia's unemployment rate declined by 1.99 percentage points from 1990 to 2001. The unemployment rates decreased by 1.99 percentage points in the NVC and 1.87 percentage points in the state from 1990 to 2001.

Ansonia's unemployment rate increased at the fourth fastest pace among NVC towns from 1990 to 1992. In the same period, the unemployment rate increased at the fastest pace in Thomaston whereas it grew at the slowest pace in Cheshire. Ansonia's unemployment rate decreased at the third fastest pace among NVC towns from 1992 to 2000. During the same period, the unemployment rate decreased at the fastest pace in

Waterbury whereas it declined at the slowest pace in Cheshire. Ansonia experienced the ninth largest decrease in unemployment rate among NVC towns from 1990 to 2001. In the same period, the unemployment rate decreased at the fastest pace in Wolcott whereas it decreased at the slowest pace in Southbury.

### Housing Stock in Ansonia

In 1997, Ansonia possessed 7,055 housing units. Of the 7,705 homes in Ansonia, 46 percent were single-family homes, 29 percent were two-family homes, 23 percent were three-plus family units, and 1 percent was mobile homes or other. In 1997, of the 142,647 housing units in the NVC, 62 percent were single-family homes, 10 percent were two-family homes, 26 percent were three-plus family units, and 2 percent were mobile homes or other. In addition, of the 1,374,566 housing units in Connecticut, 63 percent were single-family homes, 9 percent were two-family homes, 26 percent were three-plus family units, and 2 percent were mobile homes or other.

<sup>2</sup> The net grand list is net of nontaxable properties such as churches and schools. The Connecticut Office of Policy and Management (OPM) equalizes grand lists by providing an estimate for a grand list value for all 169 towns in Connecticut. It takes into account each town's revaluation date and information on real estate sales to estimate the current year grand list. This figure differs from the real grand list value, which is the sum of all types of grand list except for vehicles and personal property.
