

## **Shelton's Demographics**

### **Population**

In 2000, Shelton's population of 38,101 comprised nearly 11 percent of the NVC region. Shelton's population, the second largest in the NVC, grew by 7.58 percent from 1990 to 2000. The population in the NVC increased by 4.6 percent from 1990 to 2000 whereas Connecticut's population grew by 3.6 percent during this decade.

### **Population by Age**

In 1990, adults from the ages of 25 to 44 made up one-third of the population in the NVC and the state whereas they constituted 34 percent of Shelton's population. In the same year, people under the age of 18 comprised 23 percent of the population in the NVC, the state, and Shelton. Also in 1990, people from the age of 45 to 64 made up 22 percent of Shelton's population, 19 percent of the NVC's population, and 20 percent of Connecticut's population. The population over 65 comprised 13 percent of Shelton's population, 15 percent of the population in the NVC, and 14 percent of the state's population in 1990. The percentage of the population between 18 and 24 was 9 percent in Shelton, 10 percent in the NVC, and 11 percent in Connecticut in 1990.

In 2000, adults between the ages of 25 to 44 made up 30 percent of the population in Shelton, the NVC, and the state. In the same year, people under the age of 18 constituted 25 percent of the population in the NVC and the state and 24 percent of Shelton's population. Also in 2000, people from the ages of 45 to 64 comprised 26 percent of Shelton's population and 23 percent of the population in the NVC and Connecticut. The population over 65 constituted 15 percent of the population in Shelton and the NVC and 14 percent of the state's population in 2000. The percentage of the population between 18 and 24 was 6 percent in Shelton, 7 percent in the NVC, and 8 percent in Connecticut in 2000.

Shelton ranked 15 out of the 17 NVC towns for residents under 18 years old in 2000. It ranked eleventh for the percentage of residents between the ages of 18 and 24 in the NVC in 2000, and it was tenth for the percentage of residents between 25 and 44. It tied for the fourth highest percentage of residents over 65 in the NVC in 2000.

### **Racial and Ethnic Populations**

In 2000, African Americans constituted 1.1 percent of Shelton's population whereas they comprised 6.5 percent of the NVC and 9.1 percent of the state's population. In 2000, Latinos made up 3.5 percent of Shelton's population, 9 percent of the NVC's citizenry, and 9 percent of the population in the state. Non-white residents comprised nearly 6 percent of Shelton's population, 14.3 percent of the NVC's citizenry, and 18.4 percent of the population in Connecticut. Whites constituted 94 percent of Shelton's population, 86 percent of the NVC's population, and 82 percent of the population in Connecticut, attached DPIC Chart "Distribution of Race for Shelton 2000."

# Distribution of Age Cohorts for Shelton, 2000

Source: 2000 Census

# Age Cohorts for Shelton, 2000

Source: 2000 Census

Shelton had the ninth highest percentage of African American residents in the NVC in 2000. It possessed the sixth highest percentage of Latino residents in the NVC in 2000. Shelton also had the sixth highest percentage of non-white residents in the NVC in 2000. Waterbury possessed the highest percentage of non-white residents in the NVC.

### **Change in Racial and Ethnic Populations**

During the period from 1990 to 2000, the percentage of African Americans in Shelton's population increased by 25 percent (from 342 to 428) in Shelton whereas it grew by 23.3 percent in the NVC and 13 percent in Connecticut. Shelton's African American population grew at the seventh fastest pace among the 17 towns in the NVC.

The Latino population significantly increased in Shelton, the NVC, and Connecticut in the last ten years. The Latino population expanded by 51 percent in Shelton (from 880 to 1,326), 64 percent in the NVC, and 50 percent in Connecticut from 1990 to 2000. During the last ten years, the Latino population in Shelton grew at a *slower* pace than 13 of the 17 NVC towns.

In 1990, 19,367 Latinos in the NVC constituted 5.67 percent of the region's total population. In the same year, 213,116 Latinos in Connecticut made up 6.48 percent of the state's entire population.

In 2000, 31,756 Latinos in the NVC constituted 8.9 percent of the region's total population. In the same year, 320,323 Latinos in Connecticut made up 9.41 percent of the state's entire population.

### **Educational Attainment in Shelton**

*The following categories measure the highest degree achieved by a person.*

For example, the figure that 18 percent of the citizens in Connecticut graduated from college means that a bachelor's degree is the highest level of education attained by 18 percent of Connecticut residents.

In 2000, 19 percent of people in Shelton over the age of 25 earned a college degree as their highest form of education whereas 15 percent of the residents in the NVC and 18 percent of citizens in the state graduated from college and did not pursue their education beyond this level.

In the same year, 28 percent of Shelton's population over the age of 25 attended college for a period of time without receiving a bachelor's degree and 26 percent of the citizens in the NVC and 24 percent of Connecticut residents went to college without obtaining a degree.

In 2000, 13 percent of residents in Connecticut held a professional degree, 10 percent of the NVC's citizens possessed a professional degree, and 11 percent of Shelton's residents had a professional degree.

# Distribution of Race for Shelton, 2000

Source: 2000 Census

# Percentage Point Difference in Race Cohorts from Connecticut for Shelton, 2000

Source: 2000 Census

Slightly less than 30 percent of residents in Shelton did not pursue any further education after receiving a high school diploma. By contrast, 31 percent of NVC residents and 29 percent of the citizens in Connecticut did not attend school after they received their high school diplomas.

In Shelton, 13 percent of the residents failed to receive a graduate equivalency diploma (GED) whereas 18 percent of NVC residents and 16 percent of Connecticut's citizens did not receive a GED as their highest degree of formal education.

*The following statistics examine the percentage of residents who graduated from college.*

Within the NVC, Shelton has the seventh highest percentage of residents over the age of 25 who received *at least* a college degree. It ranks behind the state but not the NVC for percentage of residents over 25 who received a college degree. Cheshire has the highest percentage of college graduates among NVC towns. Waterbury possesses the lowest percentage of citizens who received *at least* a college degree in the NVC.

The percentage of residents who possessed *at least* a college degree increased by more than 40 percent in Shelton during the period from 1990 to 2000. Shelton experienced the third greatest percent gain in college graduates among NVC towns during this period. It ranks ahead of the NVC and the state for percent increase in residents with a college degree. The percentage of college graduates decreased in Waterbury over the last ten years whereas the percentage of college graduates grew by nearly 70 percent in Bethlehem.

### **Poverty in Shelton**

In 1999, 3.2 percent of Shelton's population lived below the poverty line. In the same year, 7.9 percent of Connecticut's residents and 7.7 percent of the people within the NVC lived in poverty. Shelton possessed the tenth largest percentage of people in poverty within the NVC in 1999. Waterbury and Derby had the highest percentage of residents living in poverty in the NVC in 1999. Prospect and Oxford had the smallest percentage of residents living in poverty in the NVC in 1999.

In total, 1,208 of Shelton's residents live in poverty. Shelton possessed the fourth highest number of residents living in poverty in the NVC in 1999. Waterbury and Naugatuck possessed the highest number of residents living in poverty within the NVC in 1999. Bethlehem and Prospect tied for the lowest number of people living in poverty among NVC cities and towns in 1999.

### **Increases in Poverty In Shelton, 1989-1999**

The population living in poverty in Shelton increased by 39 percent (from 867 to 1,208) from 1989 to 1999. Over the same period, the poverty population increased by 30 percent in the NVC and 19 percent in the state. Shelton experienced the ninth largest percent increase in people living in poverty within the NVC from 1989 to 1999. Beacon Falls, Southbury, and Thomaston possessed the highest percent increases in poverty population in the NVC from 1989 to 1999.

During this ten-year period, five NVC towns (Bethlehem, Prospect, Watertown, Middlebury, Seymour) experienced a decrease in the number of residents living in poverty.

Shelton's poverty population increased by 341 residents from 1989 to 1999. Shelton experienced the fourth largest increase in the number of residents living in poverty within the NVC towns from 1989 to 1999. Within the NVC, Waterbury and Naugatuck's poverty populations grew by the largest number whereas Watertown and Seymour's poverty populations decreased by the largest number from 1989 to 1999.

## **Income in Shelton**

### **Median Household Income**

People in Shelton earn much more than those in the state.<sup>1</sup> The median household in Shelton in 1999 was \$67,292, which was significantly more than the median household income in Connecticut (\$53,935). In 1999, Shelton had the seventh highest median household income in the NVC. Median family income was lowest in Waterbury (\$34,285) and highest in Cheshire (\$80,466) within the NVC in 1999.

Over time, the median income of households in Shelton increased at a faster rate than the increase in median household income in Connecticut. The median household income increased by 35 percent in Shelton from 1989 to 1999 whereas it increased by 29 percent in Connecticut. Shelton experienced the seventh highest percent increase in median household income in the NVC from 1989 to 1999. Waterbury had the lowest percent increase in median household income (12%) and Bethlehem experienced the highest percent increase (43%).

The annual average increase in median household income grew at a faster pace in Shelton than it did in Connecticut. The annual average growth rate in median household income was 3.02 percent in Shelton and 2.60 percent in Connecticut. Shelton had the seventh largest annual average increase in median household income in the NVC from 1989 to 1999. Waterbury had the lowest average annual increase (1.17%) whereas Bethlehem experienced the highest average annual increase in median household income (3.63%).

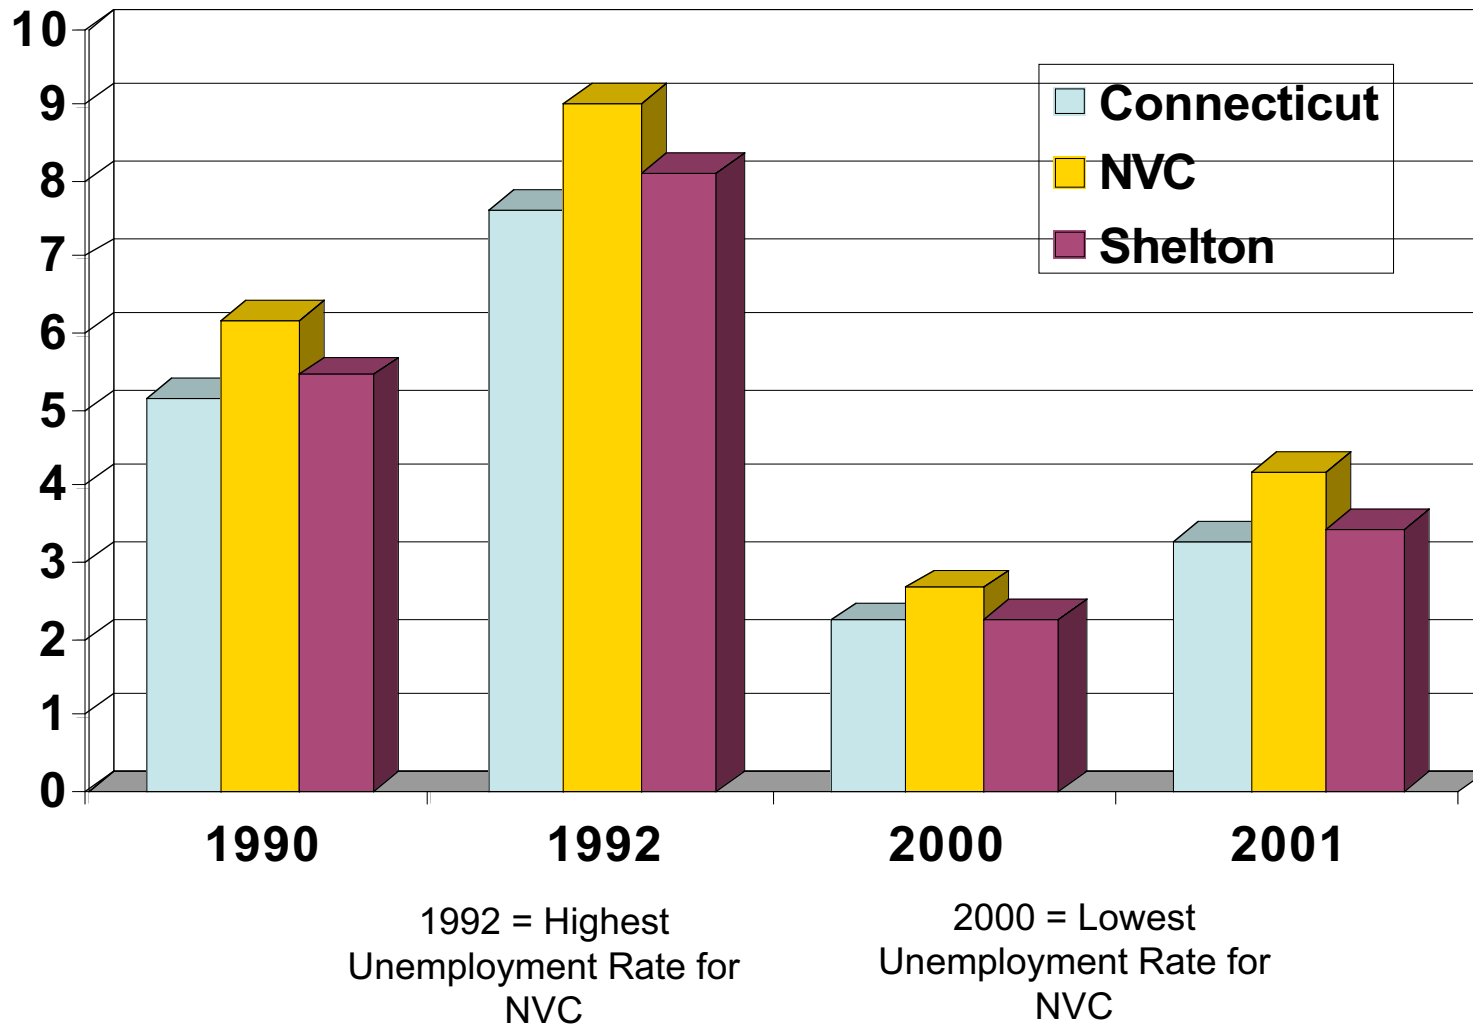

The median household income in Shelton increased by \$17,327 from 1989 to 1999 and it increased by \$12,214 in the state during this ten-year period. Shelton had the seventh highest increase in median household income in the NVC from 1989 to 1999. Waterbury's median household income increased by the fewest dollars (\$3,752) whereas Oxford experienced the largest absolute increase in median household income (\$22,678) among NVC towns from 1989 to 1999.

---

<sup>1</sup> The median household income for the NVC is unavailable. "The median calculations for the NVC could only be calculated by the Census Bureau because the calculation would need every household's income in the NVC for this calculation." We decided against calculating the average incomes for the households in the NVC because these incomes would be badly skewed in some of the smaller towns.

# Unemployment Rates For Connecticut, NVC, and Shelton, Selected Years

# Indexed Growth of Labor Force for Connecticut, NVC, and Shelton, 1990-2001

Source: Connecticut Department of Labor

Shelton's ranking for median household income among NVC towns decreased from 1989 to 1999. Shelton ranked 4<sup>th</sup> out of the 17 NVC towns for median household income in 1989 whereas it ranked 7<sup>th</sup> for this category in 1999.

### **Unemployment and Labor Force Characteristics in Shelton**

In 2001, the unemployment rate was 3.45 in Shelton, 4.21 in the NVC, and 3.28 in Connecticut. In that year, Shelton possessed the eighth highest unemployment rate among NVC towns. Waterbury had the highest unemployment rate (6.02) whereas Cheshire possessed the lowest unemployment rate (2.19).

In 2001, Shelton possessed 11.2 percent of the labor force in the NVC. Its total labor force of 19,939 was the second largest in the NVC in 2001. Waterbury maintained the highest share of the NVC's labor force at 29 percent whereas Bethlehem only possessed 1.1 percent of the NVC's labor force in 2001.

Shelton maintained 9 percent of the unemployed labor force in the NVC in 2001. Shelton had the second highest share of the NVC's total number of unemployed in 2001. Waterbury possessed the largest share of unemployed (41%) whereas Bethlehem possessed the smallest share (.64%) of the NVC's unemployed in 2001.

### **Changes in Labor Force and Unemployment Rates Over Time**

Shelton's labor force decreased by 4.3 percent from 1990 to 2001 whereas the labor force in the NVC and the state decreased by 6.7 percent and 6.3 percent, respectively. In 1990, Shelton's labor force was 20,834 whereas it was 19,939 in 2001. In total, Shelton lost 895 workers from 1990 to 2001.

From 1990 to 2001, Shelton's unemployment rate was highest in 1992 when it reached 8.13. The highest unemployment rates for the NVC and the state over the last 11 years were 9.03 for the NVC and 7.63 for Connecticut. These high unemployment rates also occurred in 1992. Shelton's low for unemployment rate was 2.27 in 2000. The lows for the NVC and the state were 2.68 and 2.25, respectively. These low unemployment rates also took place in 2000. Note Chart Unemployment Rate for Connecticut, NVC, and Shelton, 1990-2001.

Shelton's unemployment rate increased by 2.66 percentage points from 1990 to 1992. The unemployment rates grew by 2.82 percentage points in the NVC and 2.47 percentage points in the state from 1990 to 1992. Shelton's unemployment rate decreased by 5.87 percentage points from 1992 to 2000. The unemployment rates decreased by 6.35 percentage points in the NVC and 5.37 percentage points in the state from 1992 to 2000. Shelton's unemployment rate declined by 2.03 percentage points from 1990 to 2001. The unemployment rates decreased by 1.99 percentage points in the NVC and 1.87 percentage points in the state from 1990 to 2001.

Shelton's unemployment rate increased at the sixth slowest pace among NVC towns from 1990 to 1992. In the same period, the unemployment rate increased at the fastest pace in Thomaston whereas it grew at the slowest pace in Cheshire. Shelton's unemployment rate decreased at the

tenth fastest pace among NVC towns from 1992 to 2000. During the same period, the unemployment rate decreased at the fastest pace in Waterbury whereas it declined at the slowest pace in Cheshire. Shelton experienced the eighth largest decrease in unemployment rate among NVC towns from 1990 to 2001. In the same period, the unemployment decreased at the fastest pace in Wolcott whereas it decreased at the slowest pace in Southbury.

### Housing Stock in Shelton

In 1997, Shelton possessed 14,135 housing units. Of the 14,135 homes in Shelton, 78 percent were single-family homes, 7 percent were two-family homes, 12 percent were three-plus family units, and 4 percent were mobile homes or other. In 1997, of the 142,647 housing units in the NVC, 62 percent were single-family homes, 10 percent were two-family homes, 26 percent were three-plus family units, and 2 percent were mobile homes or other. In addition, of the 1,374,566 housing units in Connecticut, 63 percent were single-family homes, 9 percent were two-family homes, 26 percent were three-plus family units, and 2 percent were mobile homes or other.

<sup>2</sup> The net grand list is net of nontaxable properties such as churches and schools. The Connecticut Office of Policy and Management (OPM) equalizes grand lists by providing an estimate for a grand list value for all 169 towns in Connecticut. It takes into account each town's revaluation date and information on real estate sales to estimate the current year grand list. This figure differs from the real grand list value, which is the sum of all types of grand list except for vehicles and personal property.
